SUMMARY

Senior Product Designer with 10 years across enterprise and consumer products. At lululemon, designed both sides of clienteling: the platform ~30 Personal Shoppers use to serve up to 27,000 guests, and the Lookbooks those guests shop. Previously led design at LVL Wellbeing, coaching designers and building its bilingual design system for 200k+ users, created the Cedulify app end to end, and designed a company-wide learning platform for Novartis at Accenture.

WORK EXPERIENCE

Senior UX Designer | lululemon — May 2026 – Present

- Lead end-to-end UX for lululemon's enterprise clienteling platform, a connected workspace that lets ~30 Personal Shoppers serve up to 27,000 guests, each managing up to 900.
- Redesigned task management and guest follow-up into an urgency-based system, informed by 20+ interviews and usability sessions, cutting the steps to complete a guest follow-up by 30%.
- Introduced AI-assisted Guest Insights, with guest summaries, surfaced sales opportunities and ready-to-edit message drafts, keeping shoppers in control by requiring review before anything is sent.
- Created shoppable Lookbooks end to end, from curation in the shopper tool to the guest shopping the look, connecting the internal workflow to the customer experience.
- Defined role-based permissions and navigation across 3 roles and 25+ screens, clarifying who can access guest records and messaging.
- Partnered with 2 product managers and 8 engineers to resolve design trade-offs, defining interaction patterns, system states and recovery paths across 3 releases now in daily use in stores.

Career Break | Parental leave — Sep 2025 – May 2026

Lead Product Designer | LVL Wellbeing — Sep 2021 – Sep 2025

- Led design across web and mobile for a Headspace-style B2B wellness app used by 200,000+ people at clients including Pfizer, Accenture and Cigna.
- Promoted to Lead Product Designer after already leading in practice: set design direction, decided what to build, pushed back on scope and changed plans when needed.
- Onboarded and coached 2 designers and delegated work to them, bringing them up to speed on the product's history and the design system.
- Presented designs to enterprise clients and stepped in for the product manager during their absence, running stakeholder meetings and gathering requirements.
- Started and owned the bilingual design system that 6–7 developers built from, with right-to-left Arabic support from day one, giving English and Arabic true parity.
- Structured the system with atomic design and shared foundations for colour, type, spacing and states, speeding delivery without design debt.
- Created a one-tap daily check-in, a Teams community space, and a team-lead dashboard with a data analyst covering sentiment, adoption and wellbeing trends.

UX Instructor | Canadian College of Technology & Business — Sep 2024 – Aug 2025

- Mentored students through hands-on UX projects, critiques and usability testing across 10+ classes, teaching research, information architecture and interaction design.

Product Designer | Cedulify May 2020 – Sep 2021

- Designed a consumer routines app end to end, partnering directly with the CEO to turn the vision into one product: onboarding, calendar, activity library, guided journal and the Harmony Wheel.
- Created a conversational, personalised onboarding flow that became one of the app's most valued features.
- Visualised time balance with the Harmony Wheel, showing how time splits across 8 life areas so users can spot imbalance and act on it.

UX Designer | Accenture Jan 2016 – Dec 2018

- Designed a company-wide learning management system that Novartis employees use to complete required training, working with developers, designers and a project manager.
- Simplified training with a personal learning dashboard that shows only relevant courses, due dates first, replacing searches through the full catalogue.
- Restructured the course catalogue and search with filters for role, language and format, and created role-based learning paths for onboarding.
- Replaced exported spreadsheets with manager and admin reporting and one-click reminders.

PROJECTS

Pick | Concept mobile app Aug – Oct 2019

- Created a concept app that tells people instantly whether a scanned product is safe for their diet or allergies, shaped by 30 user interviews and prototype testing.
- Designed scanning, diet profiles and family profiles, and created the brand, logo animation and prototype as UX/UI designer and creative director.

KEY SKILLS

Product & Interaction Design: End-to-End Product Design, Interaction Design, Information Architecture, Complex Workflows, Role-Based Permissions, Dashboards & Data Visualisation, Responsive Web & Mobile, Prototyping

Design Systems: Component Libraries, Atomic Design, Foundations (Colour, Type, Spacing), UI States, Right-to-Left & Bilingual Design, Design–Engineering Handoff

Research & Strategy: User Interviews, Usability Testing, Journey & Workflow Mapping, Requirements Gathering

Leadership: Design Direction, Mentoring & Delegation, Client Presentations, Roadmap Prioritisation, Workshop Facilitation, Stakeholder Alignment

AI: AI-Assisted UX, Human-in-the-Loop Design, AI-Assisted Prototyping

Tools: Figma, FigJam, Miro, Adobe Creative Suite, Jira, Confluence, Claude

EDUCATION & CERTIFICATIONS

- 3D Modelling & VFX Production | Humber College, Toronto · 2020
- Digital Design | Vancouver Film School · 2019
- Bachelor of Engineering | Osmania University, Hyderabad · 2012 – 2016
- AI for Product Design · 2026 | AI for Designers · 2025
